1. The following is an examiner's statement of reasons for allowance: Basis for the amount of OH groups modified with NCO is on page 6, lines 18-21 of the instant specification. There is not verbatim basis in the originally filed specification for "at least a stoichiometric ratio of isocyanate groups to hydroxyl groups". However, the law does not require verbatim basis, only that the applicant had possession of the invention at the time of filing. It is clear from page 9, lines 1-11 that wide ranges of NCO to OH are encompassed by the applicant and further that excess NCO is desired in water. The skilled artisan usually will use enough to consume all OH groups, which is the minimum of 1:1 NCO to OH. The applicant is therefore considered to have had possession of the newly claimed NCO:OH range which reads on 1:1 and up NCO:OH. The new matter rejection is therefore withdrawn. There appears to be some discrepancy in the page numbering referred to by the applicant and the pages as numbered in the application examined.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
